MOHAMMED NAVEED A

.NET Engineer | Azure Cloud & AI-Native Development

Chennai, India | +91 6369525936 | mohammednaveeda10@gmail.com | linkedin.com/in/muhammednaveed

PROFESSIONAL SUMMARY

Self-motivated **.NET / Backend Engineer** with 4+ years of hands-on experience designing, modernizing, and scaling high-throughput enterprise applications and Azure cloud solutions. Expert in building ASP.NET Core microservices, automating complex workflows, and integrating AI-native features using LLMs and AI agents. Proven record of leading cross-functional engineering teams, executing zero-downtime migrations for 40+ legacy systems, and consistently delivering mission-critical client projects on time with exceptional reliability.

TECHNICAL SKILLS

Backend Development: C#, ASP.NET Core, Web API, Entity Framework Core, Dapper, LINQ

Frontend Development: React, Redux, Saga, JavaScript, Bootstrap, NPM, Yarn, Vite

Architecture & Design: Microservices, Monolithic Architecture, RESTful APIs

Databases & Optimization: SQL Server, PostgreSQL, MySQL, Raw SQL Queries, Stored Procedures, Views, Indexing & Performance Tuning

Cloud & DevOps: Microsoft Azure (Entra ID, App Service, Cosmos DB, Function App, Storage Accounts, App Registrations, Service Bus, App Configuration, App Insights), AWS EC2, AWS S3, AWS IAM, CI/CD, Git.

Messaging: Service Bus, Event Hubs, IoT Hub, RabbitMQ, SMTP Mail

AI Engineering: LLM APIs, AI Agents, Model Context Protocol (MCP), Claude, Microsoft Foundry

Testing & Tools: NUnit Testing, NuGet Package, .NET CLI, OpenAPI / Swagger, Postman, Jira, Azure Boards, SharePoint, Cursor, Antigravity

Security & Quality: Checkmarx (SAST), vulnerability remediation, Software Design Documents (SDD), Agile Methodologies, Code Review

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Ideassion Technology Solutions, Chennai **May 2022 – Present**

Client: Buckman Laboratories International – US based global vendor of digital water and industrial chemical platforms

- Delivered **four client projects with a 100% on-time rate** by leading a **14-member team** through E2E feature development across backend, web & mobile.
- Migrated **40+ legacy projects** to modern **.NET and EF Core**, improving performance by **75%** and reducing technical debt.
- Shipped backend, web, and mobile applications to production with **zero post-launch issues** by building **ASP.NET Core** APIs and **microservices** on **MS SQL Server**.
- Cut manual turnaround time by **80%** by automating background jobs with **schedulers** and **Simple Mail Transfer Protocol** notification workflows.
- Streamlined Azure infrastructure with **CI/CD** release pipelines using Azure DevOps.
- Built and optimized **RESTful APIs** in ASP.NET Core for high-volume data processing and third-party integration, standardizing **OpenAPI / Swagger** specs to speed up UI and partner integration.
- Covered **100% of functional requirements** for a new Solution & Profitability Platform by authoring **Software Design Documents** for multi-customer chemical-product billing.
- Constructed AI-native features with **LLM APIs, AI agents and MCP**, within 2 months, automating key workflows & reducing manual effort.
- Published open-source NuGet package BulkDataSeeder.EfCore to automate EF Core bulk data seeding with **7.7k+ downloads**.

KEY PROJECTS

AI-Native Logistics Platform – Orchestrated an autonomous logistics framework utilizing Artificial Intelligence agents to automate route optimization and inventory forecasting, **reducing delivery turnaround times by 25%,** and **improving tracking accuracy to 99.9%**. Engineered interactive cargo tracking dashboards handling **5k+ daily shipments** in Next.js and Node.js, establishing resilient RESTful endpoints with comprehensive error handling. Designed the full-scale monitoring frontend in React and TypeScript, backed by a modular, reusable UI component library.

Aggregated Inventory Tracking & Business Review - Programmed backend services tracking chemical containers, deliveries and site inventory in real time, built revenue and pricing computation models with **99.9% accuracy** and reduced delivery TAT for bulk and packaged orders.

Connected Lab - Built a lab-request workflow letting customers submit, process, and analyse process samples, with reporting and **third-party lab integration**.

Security Remediation - Managed & resolved **313+ Checkmarx SAST vulnerabilities** (including SQL injection, XSS, CSRF, and broken access control) across core ASP.NET Core microservices and REST APIs. **Integrated SAST Scanning:** Embedded Checkmarx vulnerability scanning directly into **Azure DevOps CI/CD release pipelines**, blocking insecure code deployments, and reducing security debt. Modernized **authentication & authorization layers** across platform services to align with enterprise security benchmarks.

Ackumen Product Predictor - Implemented a survey-driven chemical selection and advisory platform used in customer solution proposals. Developed an automated decision service (AP Engine) that calculates exact treatment programs, dosage specifications (pH/CoC), and biocide additives from cooling tower operational assessments. Created secure microservice channels over HTTPS with **PIMS and BUPR SQL databases** to query product costs, formulations, and viscosity metrics across **5,000+ catalog items**. Streamlined downstream sales workflows by transmitting standardized output payloads directly into 3 core modules (Equipment Selection, Ordering, Proposal Generation), **cutting proposal creation time by 60%**.

Live Chat Transcript - Connected Social Intents live chat with Ackumen using high-performance HTTP Client instances, **automating transcript archiving for 100% of customer sessions** and **saving ~15 support hours weekly**. Applied asynchronous webhook processing to capture end-of-session payloads, parse unstructured conversational metadata, and persist logs directly into database repositories. Enhanced operational reliability by designing custom retry policies and structured error logging for external HTTP dependencies, achieving **99.9% message retention**.

3PC Controller Calibration (IoT) - Architected an **event-driven IoT edge** backend on **Azure Functions** integrating third-party controllers for **real-time remote calibration** & GUI-driven analytics. **Engineered Remote 1-Point & 2-Point Sensor Calibration Services:** Developed backend services to process handheld MDE & standard solution baseline inputs, enabling mechanized slope and offset error corrections for high-precision water treatment sensors. **Streamlined Telemetry Data Ingestion:** Built scalable event pipelines managing real-time IoT controller telemetry, Connected Lab analytical data, and CSV batch ingestion for industrial Big Data analytics.

CERTIFICATIONS

Microsoft Certified: **Azure Administrator Associate (AZ-104)** | **Azure Fundamentals (AZ-900)** | Anthropic: **Claude 101** | **Azure Data Engineering (DP-700)**

INTERNSHIP

Ideassion Technology Solutions — **Chennai**

Software Engineer Trainee - Intern — **Jan 2022 – April 2022**

EDUCATION

MEASI Institute of Information and Technology — **Chennai**

Master of Computer Applications - MCA, Computer Application — April 2022

The New College — **Chennai**

Bachelor of Computer Applications - BCA, Computer Application — April 2020

SOFTSKILLS

- **Effective Stakeholder Communication** – Connected directly with US-based enterprise leaders (Buckman Laboratories) to translate complex business needs into actionable tech specs & functional proposals.
- **Technical Design** - Authored comprehensive Software Design Documents (SDDs) covering 100% of functional requirements for complex domain platforms, including multi-customer chemical billing engines.
- **Public Speaking & Knowledge Sharing** - Communicated technical roadmaps to client leadership and active open-source contributor sharing solutions with the broader global developer community.
- **Adaptability & Continuous Learning** - Expanded technical expertise across emerging domains including AI engineering, IoT edge telemetry, cloud administration, and smart contract development.
- **Leadership -** Directed cross-functional teams with a 100% on-time client project delivery record.
- **Conflict Management** - Enforced rigorous quality standards across the engineering lifecycle via code reviews, security vulnerability remediations, and Agile practices.
- **Strategic & Probabilistic Thinking** - Evaluated trade-offs across architectural patterns (monolithic vs. microservices, event-driven IoT edge vs. REST) and pioneered early adoption of AI-native workflows.
- **Problem-Solving** - Strong analytical skills with an initiative-taking approach to troubleshooting and optimizing systems.
- **Teamwork** – Proactive team collaborator with a focus on achieving collective goals.
- **Time Management** - Effectively prioritizes tasks and meets deadlines in a fast-paced environment.
